

FIRST NOTICE OF A PROPOSAL
by Invenergy Solar Canada ULC (Invenergy Canada) to
Engage in Renewable Energy Projects

FIRST NOTICE OF PUBLIC MEETING
To be held by Invenergy regarding the Sandringham and Woodville Solar Projects and
Proposal to Engage in a Renewable Energy Project

Project Names: Sandringham and Woodville Solar Farms
Project Location: Near the Community of Woodville, City of Kawartha Lakes, Ontario
Dated at: City of Kawartha Lakes this 18th day of June, 2010.

Invenergy Canada is planning to engage in two renewable energy projects that require the issuance of Renewable Energy Approvals (REA). The proposed solar facilities would be located near the community of Woodville in the City of Kawartha Lakes (see map below). Invenergy Canada has received contracts from the Ontario Power Authority (OPA) for the purchase of electricity generated by photovoltaic solar panels from these projects through the Province's Feed-in-Tariff (FIT) program. This program is part of the *Green Energy and Green Economy Act* that became law last year. The distribution of this notice of a proposal to engage in the projects and notice of public meeting as well as the projects themselves are subject to the provisions of the *Environmental Protection Act* (Act) Part V.0.1 and Ontario Regulation 359/09 (Regulation). The REA replaces approvals formerly required under the *Environmental Assessment Act*, *Planning Act*, and *Environmental Protection Act*. This notice is being distributed in accordance with section 15 of the Regulation prior to an application being submitted and assessed for completeness by the Ministry of the Environment.

Meeting Information:

In order to provide information to and consult with community members, First Nations communities and government agencies, Invenergy Canada and Dillon Consulting are hosting a public information session for both projects. At this information session, you will be able to view project information, collect handouts, ask questions and provide comments directly to the proponent.

DATE: Wednesday July 21st 2010
TIME: Open house between
5pm – 8pm
PLACE: Woodville Town Hall
100A King, Woodville
Ontario K0M 2T0

Project Description:

If approved, each proposed project would have a total name plate capacity of 10 MW AC and would be rated as a 'Class 3 Solar Facility' pursuant to the Act and Regulation. The locations of the projects are outlined in the adjacent map. All solar panels will be located within each project boundary.

Documents for Public Inspection:

Two draft Project Description Reports entitled *Sandringham Solar Farm – Project Description Report* and *Woodville Solar Farm – Project Description Report* are being prepared. They will outline the details of the projects, including information on the solar technology and associated project components and activities. This report will be made available for public inspection in mid July on Invenergy Canada's website (<http://sandringham.inveneryllc.com> and <http://woodville.inveneryllc.com>) and in the Clerk's office at the Kawartha City Hall, 1st floor, 26 Francis Street, Lindsay, Ontario.

Project Contacts and Information:

To learn more about the proposed projects and upcoming public information session, or to provide comments in writing please contact:
